Information Requested

1.) As attached picture , specs for duct covering says Canvas and adhesive as (Lagging material) , but as no manufacturer is mentioned , so the one we use from Impro , the material data sheets are attached . This was require as per site Super to review !

2.) Second thing discussed was , Due to confined space , supply and duct work , where even already ductwrap has been installed in exposed areas , we will not remove ductwrap , but instead put board insulation and then canvas lagging on top , so that even if we combine two ducts together for proper finishing purpose , the thermal insulation separation between two ducts is still maintained
