Subject: Pipe repair due to welding damage

Work summary: Damage to the pipe burned by the welders was accessed on site. The damaged section was removed and replaced using couplings. The heating system was subsequently refilled and flushed multiple times to ensure that the system was free of rust. given the potential for flash rust due to system being drained and sitting empty over night. A one hour continuous flush was performed, followed by refilling the system to a pressure of 60 pounds.
