### Information Requested

Please note that due to site condition the out door units cannot be installed in the location shown on design drawing. However it has been discussed on site to install as shown in picture #1. Please confirm if this is acceptable as theses units will have weight and vibration and are not concealed.

Secondly for CU-7,8,9,10. See picture #2 roof area recommended for these units. However we are suggesting a configuration of 2 indoor / 1 outdoor unit for HPs and ACs as the space is limited to accommodate all 4 outdoor units on the roof.

Kindly confirm so we can proceed accordingly, thanks.
