Information Requested

The demo that is supposed to take place on the ground floor for the interior lines is unachievable to reach or remove the piping. On the drawing M202 is shows the lines outside the bulkhead in the T-Bar ceiling area. All of this piping is inside the bulkhead about 30"-36" from the only entry point into the bulkhead. If they want this pipe fully removed we need every single bulkhead removed on the inner perimeter for the entire run.
